

## Dillon Farmers Market:

**Written Description:** The Dillon Farmers Market will open June 12<sup>th</sup>, 2020 in compliance with the Colorado Farmers Market Association Guidelines.

The number of vendors has been reduced by over 50%. The types of vendors have been cut to 75% offering “essential” products such as fruit, vegetables, meats, cleaning or personal hygiene supplies and other food products that are important and/or scarce to the local supply chain at this time. The remaining 25% will consist of non-food vendors. All food vendors are required to provide to go offerings. Sampling has been eliminated and food consumption will be off premise. All entertainment categories have been eliminated as have non-profit vendors whose purpose is more socially interactive in nature.

**Social distancing:** We are including one-way circulating traffic flow designated with signage (12 A-frame signs and entrance signage) and a center rope line will be in-place. Hand sanitizing stations, hand-washing stations, masks required by patrons and vendors, and contactless payment efforts have been implemented and will be continuously communicated by Farmers Market staff. Town of Dillon Police will have a presence to help reinforce social distancing protocol. The Town of Dillon booth has been relocated to the entrance of the market in an effort to provide upfront communication.

**Capacity:** The capacity of the 2020 Dillon Farmers Market is 440. The square footage of the market is 55,450 feet. When we divide that by 100 we have 554. With the 20% taken up by tents we have 440 people that we can allow into the market at a time. Town of Dillon will staff all entrances in order to monitor how many people enter and exit to stay compliant.

**Map:** Please note that arrows indicated on the map show traffic flow for vendor load-in and out outside of hours of operation for the Farmers Market.

**Business Hours:** From 9 am – 2pm all traffic will be pedestrian with circulating, one-way flow. There will be a physical, rope barrier down the centerline.

**Vendor Spacing:** Vendors will be spaced out 11 feet apart and will be able to sell from 3 sides.

**Bathrooms / Sanitizer Stations:** We will have one hand washing station at both the east end and the west end of the market next to the bathrooms. Every hour a TOD employee will wipe down contact points in the bathrooms. 4 hand sanitation stations will be placed out in the market.

**Symptom Check for Employees:** Employees will check symptoms and at home and document them.

**Masks:** We will be practicing social distancing and everyone will be wearing masks. If they do not have a mask they can obtain a free mask from the Town of Dillon tent before they enter the market. The market will be a one-way direction with a rope line in the middle to help coordinate traffic flow. We will also have rules and regulations posted at the entrance.

**Entry Points:** All customers will enter and exit from the East end of Lodgepole. The border of the market will be created by the vendor tents and fence that currently divides Lodgepole from the rec path. A rope line will divide the two directions with one-direction A frames. The west end of Lodgepole will be staffed with a TOD staff member. TOD staff members will be counting customers entering and exiting the market with clickers. Social distancing signs and rules will be at the entrance.

**Line Mitigation at Entry Point:** If a line begins to form at the entrance, we will have that line snake down the back road to backstage of the amphitheater with 6ft spacing between patrons.

**Vendor List:** Vendor list and description with the 75% / 25% break down.

**Food / Essential Vendors:**
